

Dear Parents / Guardians,

BJEM School always tries to keep pace with the changing needs of the time, and that too in a very cost effective manner, which is a unique feature of this school only. The School Management has always strived to provide an updated, interesting, healthy and safe learning ambience to the blooming minds so that the school continues to be one of the leading ones, not only in BBSR but in the State of Odisha too. Needless to mention here that the parents / guardians have always encouraged and supported us in our endeavour and we expect the same now and in future too.

The Parent – Teacher – Management meetings that we hold every year, have been an important forum, from which, we collect the valuable feedback from the learned parents and try to implement the same in our system. During such meetings held in 2015-16 and 2016-17, parents suggested to introduce the online collection of fees, RFID attendance and online accessibility to the academic matters like progress of syllabus, Progress Card etc. Keeping this in view, the School, after negotiating with few Software Companies, has ultimately entered into an agreement with CAASP LABS Pvt. Ltd. during February, 2017 and it will supply the well developed system covering all our needs. Few of the important features of the systems are highlighted herewith.

The School Management has decided to implement the School Automation ERP system from the session 2017-18 which will provide multiple benefits to the parents and empower us too. Major benefits are mentioned below :

I. Online Payment

- The Govt. of India has taken an enormous initiative to make all financial transactions cashless. Subsequently Secretary, CBSE, Delhi has also directed its affiliated schools to make all fee collection from the students only through online so that cash transactions can be avoided. Moreover many of our Parents had also requested this facility in last two Parent – Teacher - Management Meetings.
- This automated school Automation ERP system will enable parents/guardians to pay fee online from home or outside instantly and easily without standing in queues, save time and stay stress free.

II. RFID [Radio Frequency Identification Devices] Based Attendance.

This is an automated attendance system. The students will be issued an RFID ID Card and as the students pass the entry & exit points the system automatically captures the data and mobile app. notification. It also creates parents information system eg. it will send an SMS to the parents **“Mom / Dad I reached the School or Mom / Dad I left the School”** . Similar message for the absentees can also be sent. This system will thus provide students security, which is an important concern for all of us. Atleast in the higher classes, where students largely come on their own and if due to some reason he / she does not reach school in time, the matter will be brought to the notice

of parents and school immediately. This can help prevent any untoward incident and take steps at the earliest.

This will also help us to keep track of the school Bus movement [which is also in the pipeline] and parents can receive messages related to the location of the bus and thus will feel more secure regarding their wards whereabouts.

III. Other Advantages that will follow subsequently.

The system will help parents to manage their child's education in an efficient way. Parents can view the child's progress card, exam schedule, news events, Emergency messages, academic content, assignments, homework, anywhere, anytime.

“Stay in the competition and stay ahead with technology”.

In this context to apprise you of this technology the school has arranged for a meeting with the service providers and will send a message intimating you about the date and time.

Further, with regard to the cost that is involved in the process and as has been negotiated with “CAASP LABS Pvt. Ltd” for the next 7 years (2017-18 till 2023-24), there will be a uniform rate per child per month. This cost shall be borne by the Parents and the School combinedly, the details of which shall be worked out and communicated shortly.

Kindly attend the class-wise meeting for a better understanding and successful implementation of the new system.

PRINCIPAL
